**BHD activities are mainly concentrated on operating its fleet of Four Rigs, which are fully hydraulically operated rotary top head drive**

## **OUR SERVICES**

- Groundwater exploration and management
- Planning and drilling of vertical water well projects for farms
- Ground Water Monitoring Well
- Recharge & Injection Well
- Sea Water Beach Wells
- Top Hole Drilling for Oil & Gas
- Industrial Water Supply
- Restoration of water well
- Drilling, testing, installing submersible pumps, riser pipes and switch boards, etc.
- Planning of water works and pumping stations.
- Borehole testing .
- Investigation of existing water wells.
- Well reports including all field and laboratory tests.
- Complete chemical and physical analysis of ground water.
- Verification and recording of results of water well rehabilitation by surveys, pumps test, water analysis, chemical analysis.
- Measurements of PH value, EC, Pressure, water/air temperature, etc.

# OUR SERVICES

**BHD provides water well drilling by most professional methods. The team at BHD uses modern day rigs and methods and has completed thousands of water wells.**

**BHD Rigs can carry out following drilling methods and systems:**

- Conventional drilling (direct circulation drilling)
- Foam drilling
- Airlift drilling
- Mud drilling
- Hammer drilling

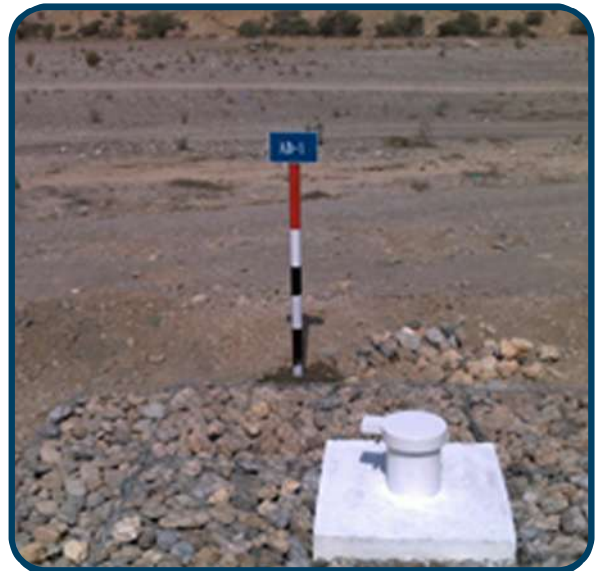

## Injection Well Drilling

BHD has acquired abundant experience in injection well construction. Taking the client requirements as the entry point, BHD provides services all over Oman for Drilling/Construction of well of injection wells

## Monitoring Well Drilling

Monitoring wells may vary in diameter depending upon their intended application, and are typically comprised of polyvinyl chloride (PVC) or stainless steel.

## Earthing pit Drilling

BHD provides drilling of pole hole of many inches wide, usually several meters below the surface or as per the client's requirements.

# Well maintenance

**Bin Hashil Drilling provides the best solutions to rehabilitate water wells/injections wells/monitoring wells:**

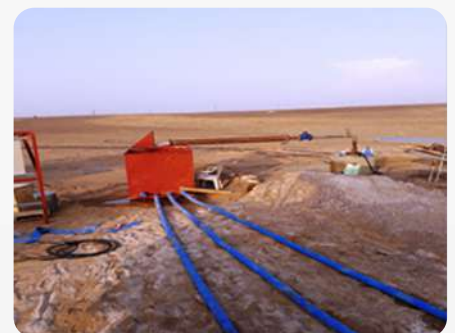

**BHD provides services for following problems**

- Decreased pumping rate
- Decreased water level
- Increased sand or sediment content in the water
- Decreased total well depth
- chemicals to dissolve the incrusting materials from the well

# Well Testing

**BHD have vast experience in undertaking various test of**

# Pipe Line Services

**BHD has a vast Experience in Water Pipe Line Networks consisting of Transmission Pipe line from Bore Well Pumps or from Pump Stations to the storage reservoirs / Tanks.**

## REASONS TO RELY ON BHD:

- ✓ **Fast and correct drilling and completion of water well drilling projects.**
- ✓ **Direct control of results.**
- ✓ **Immediate effects with short reaction times.**
- ✓ **More economical operation through individual maintenance plans.**
- ✓ **More out put through preventive well care.**
- ✓ **Preservation of investment value.**
- ✓ **Re-establishment of original well yield by early rehabilitation.**
- ✓ **Longer life of drilled water wells.**
